COMET Group at a glance

Leading global provider of high-quality systems, components and services in industrial x-ray, radio frequency and e-beam technologies

- 12 subsidiaries / branch offices worldwide
- CHF 214.4m sales*
- 99% of sales from outside Switzerland
- SIX SWISS Exchange (2002 COTN)

*2012

Headquarters in Flamatt (CH)

> 750 employees

1948 foundation

</tbody>
</table>
2012: Progress with strategic initiatives

- Improved profitability in systems division: EBITDA margin +3.8%
- Tetra Pak commits itself to COMET’s innovative e-beam technology at Anuga 2012
- Strategic focus adjusted with the “Focusing growth on strengths” program
- Industrial X-Ray: Sales growth by 9.3% with new products
- COMET RF generators established in market

Geographical split

- **North America: Strong x-ray business (+12.8%)**
- Decline in Asia mainly due to weak semicon / PV / FPD market

North America Europe Asia

- 2011
- 2012

- Europe: 35%
- North America: 4%
- Asia: 30%
- Rest of World: 31%

Total: 214.4m CHF
Market review

Sales growth in core business NDT

</tr>
</tbody>
</table>

*incl. security and thickness gauging; ** including broadcasting

---

Non-destructive testing: Growth in North America

- **Aerospace**: Significant orders in North America due to progressing film replacement
- **Electronics**: Trend of miniaturization supported demand for high resolution systems (FineFocus)
- **Automotive**: Reduced demand in Europe and Asia
- **Energy**: Increased sales with portable x-ray systems through focused sales initiatives
- **NDT Components**: Strong growth with high and low energy products, customized solutions and new applications (e.g. sorting)
Market review

**Plasma excitation: Reduced spending**

- **Semiconductor market**: downswing in demand from the semiconductor market beginning in the second quarter 2012

- **Solar and Flat panel**: stagnation due to deferral of investments; COMET well positioned for upturn

---

**Sterilization: Tetra Pak's commitment**

- > 50m packages sold sterilized using e-beam technology
- Technology unveiled by Tetra Pak at Anuga FoodTec 2012
- Overall performance confirmed: biological efficiency, cost efficiency, environmental benefits
Systems division 2012

X-Ray Systems: Initiatives to improve profitability pay off

- Sales growth by +2.8% fueled by
  - Growth in aerospace with CT systems
  - Portable solutions in Europe and Asia
- Service business fostered with new products
  (e.g. software upgrades, maintenance contracts)
- EBITDA margin improved: 6.0% to 9.8%
  - high-margin standard products and applications
  - Improved process for customized systems
  - Expanded service business to 24.9% of sales

Modules & Components division 2012

PCT: Difficult market situation managed

- Sales decline by 14%: no upturn in semicon H2
- RF engineering know-how strengthened and generators established under COMET
- Design-wins with high-quality product solutions in semicon market
- Acquisition of new customers outside semicon market
Modules & Components division 2012

Industrial X-Ray: Focus on sales initiatives bearing fruits

- +9.3% sales growth with
  - new products (high-/ low-energy)
  - new applications (sorting)
  - customized solutions in NDT and security market

- Design-wins with existing and new customers

- Growth in all regions, especially in Asia and North America

</tbody>
</table>

- X-Ray Systems showing growth in USA (aerospace industry), but decreases in Europe and Asia (automotive industry)
- Industrial X-Ray showing increases in all regions across all industries and products
- Plasma Control Technologies with significant decreases related to missing orders from semicon, flat panel and solar industry

Net sales growth in the USA

</tbody>
</table>

- Decreasing business in Europe related to automotive and semicon industry, partly compensated by additional sales from Stolberg acquisition
- Increasing USA sales in all businesses with the exception of semicon
- Asia decrease mainly driven by lower sales in both China and Japan
Lower Group net sales driven by lower sales volumes supported by positive currency impacts

Net exposure of CHF 56m to USD for FY 2012

- Stronger USD exchange rate has contributed to an overall positive impact on

- **Net sales**: The positive net impact of all currencies amounted to 4.8 Mio. CHF. (EUR with a negative impact of 1.8 Mio. CHF; all other currencies with a positive impact of 6.6 Mio. CHF)

- **EBIT**: positive net impact of 4.0 Mio. CHF (Limited impact on EUR due to almost natural hedge; all other currencies with positive impact)
Division Systems: Profitable growth driven by increased gross profit margin of 5%

Net sales (Increase 2.8%; 1.4% in LC*)

Division Modules & Components: Decrease in profitability related to lower sales and higher investments in front-end for future business

Net sales (Decrease 4.0%; 6.5% in LC*)
Improved gross profit margin in challenging market environment

</table>

Net income in 2012 below prior year driven by an increase in income tax expenses

- Operating income of CHF 12.8m (PY CHF 14.7m)
- Net financing expenses CHF 2.3m (PY CHF 4.0m)
- Income tax expense CHF 4.5m (PY 0.6m)

EPS: 13.22 CHF 7.86 CHF
Financing items improved due to lower interest-bearing debt and stable currency exchange rates

Net financing items amounted to an expense of CHF 2.3m (PY CHF 4.0m), reflecting the following factors:

- Interest expenses were CHF 2.0m (PY CHF 2.5m) related mainly to senior debt and mortgage on building in Flamatt
- Due to the stable Swiss franc, the net currency transaction loss recorded in the income statement was reduced to CHF 0.3m (PY CHF 1.5m)
- Almost naturally hedged position in EUR
- Net exposure in USD hedged by means of forward exchange contracts

Currency impact on balance sheet:

- A currency translation loss of CHF 1.1m was recorded directly to equity, mainly related to the net asset exposure in Euros

Income tax rate above prior year due to uneven distribution of profits between subsidiaries

- Applying the expected Group tax rate, the EBT of CHF 10.4m would lead to an expected tax expense of CHF 2.9m
- Total income tax expense reported sums up to CHF 4.5m (PY CHF 0.6m). The difference to the expected tax expense of CHF 1.6m is explained as follows:
  - Tax exemption by canton of Fribourg CHF -1.1m
  - Non-recognition of tax losses CHF 2.1m (no DTA recognized)
  - Impact of tax exemption of COMET HOLDING CHF 0.4m
  - Other effects (focus on portable business in Copenhagen), net CHF 0.2m
- The consolidated tax rate of 43% is clearly above prior year’s 5%, mainly due to an uneven distribution of EBT between the different subsidiaries in 2012 and the recognition of a DTA in 2011
- The base income tax rate for normalized profits is at 28%. The expected tax rate for 2013 is at approx. 35%
Strong free cash flow based upon a profitable business

Sound balance sheet ratios and decrease of total assets amount

- Improved equity ratio to 58% driven by profitability and despite posting treasury stock of CHF 4.4m to equity
- Reduction of total assets amount related to repayment of debt, amortization of intangible assets (PPA) and repurchases of treasury stock
- Increasing balance sheet positions in working capital and accruals
Stable working capital ratios

Working capital ratios

- Total net working capital increased by CHF 3.7m. Monthly average net working capital in % of net sales reached 26.1% (PY 26.8%) reflecting our efforts to optimize capital employed.
- Increase in trade receivables to CHF 36.0m (PY CHF 30.9m) reflecting strong net sales volumes towards year-end. DSO (monthly average days sales outstanding) reached 38 days (PY 43 days).
- Inventories remain at CHF 35.4m (PY CHF 35.4m) reflecting an expected slight increase in business for 2013. DIO (monthly average days inventory outstanding) reached 75 days (PY 73 days).

Liquidity on a comfortable level

- Liquidity decreased by CHF 3.3m driven by the purchase of treasury shares of CHF 4.4m, continuous investments in fixed assets, dividend payment and substantial repayment of interest-bearing debt (undrawn credit facilities of CHF 21.8m).

Non-current assets influenced by amortization of intangible assets (PPA)

Non-current assets decreased by CHF 7.7m or 6.6%

- Compared to prior year-end property, plant and equipment and intangible assets decreased by CHF 7.8m.
- Cash capital expenditures as a mixture of replacement and capacity increases totaled CHF 5.7m and the net effect of demo equipment recognized was CHF 0.3m.
- Non-current assets included depreciation of CHF 7.6m and amortization of CHF 5.1m (including CHF 3.2m from purchase price allocation of YXLOm and Stolberg).
- Negative translation effects from strong Swiss franc totaled CHF 1.1m.
- Pension assets increased to CHF 3.2m (PY CHF 2.8m).
- Deferred tax assets decreased to CHF 0.8m (PY CHF 1.5) due to the use of deferred tax assets on tax loss carry forwards mainly in Germany.
Lower Liabilities and strong equity ratio

Current liabilities increased by CHF 4.9m, mainly driven by:
- Increase in accrued expenses (bonus, vacation and overtime credits)
- Decrease in other financial liabilities (derivatives for FX hedging)

Non-current liabilities fell sharply by CHF 8.8m, mainly due to:
- Repayment of interest-bearing debt
- Slight increase in deferred income tax liabilities

Increase in equity ratio from 57.2% to 58.0%:
- Net income of CHF 5.9m for the FY 2012
- Share-based payments of CHF 1.1m
- Distribution to shareholders of CHF 4.00 per share totaling CHF -3.1m
- Foreign currency translation differences CHF -1.1m
- Repurchases of treasury stock of CHF -4.4m

Ongoing reduction in net debt and increase in equity ratio

Strong increase of the equity ratio from 52% to 58% in three years
Excluding repurchases of treasury stock: Net debt at CHF 21.5m; equity ratio at 58.9%
Equity ratio net of intangible assets reaches 45%

- Ongoing amortization of intangible assets (mainly related to acquisitions) reduced the share of intangible assets in equity from 63% to 41%.
- Equity ratio net of intangible assets almost doubled since the major acquisition of YXLON activities in 2007, raising from 25% to now 45%.

Dividend payment out of distributable paid-in capital

- The Board of Directors proposes to distribute CHF 4.00 per share out of the reserve of distributable paid-in capital (pay-out ratio 51%).
Outlook 2013

- Board of Directors and Management confirm:
  - CHF 230-250 million sales
  - 12% to 14% EBITDA margin

- Slight recovery in semiconductor industry in H1 2013 is expected to increase in H2 2013
- Other segments with continued growth
- H1 2013 on H1 2012 level expected
- H2 2013 with significantly stronger development vs. H2 2012
2013: H2 significantly stronger than H2 2012

<table>

Strategy 2015: Focusing growth on strengths

1. Build on innovative technologies
   Exploiting global market trends

2. Promote strong organic growth
   Based on scaling of existing products and technologies, exploiting global market trends

3. Accelerate emerging businesses
   To fully exploit the high potential (e-Beam, HF generators, Portable x-ray)

4. Enhance operational excellence
   Increase productivity and profitability

Outlook 2015

Strategic implications

Sales
- M&C division, and especially Plasma Control Technology with more than proportional growth
- e-beam with significant contribution to Group sales growth after 2015
- Expected sales split of 60% (M&C division) to 40% (Systems division) from today’s 50% to 50%

Profitability
- M&C division with improved profitability 2015 mainly due to higher sales volume
- Improvement of EBITDA margin to above 10% in Systems division expected
- Investments in e-beam business development will have an adverse effect on profitability

---

e-beam / Tetra Pak Update

Who is Tetra Pak?

Privately owned / the world’s leading food processing and packaging solutions company in packaging of liquid food

- Sales 2011 (MEUR) 10'360
- Head counts 2011 22'896
- Machines in operation 2012 8'688
- Machines delivered p.a. 2011 520

167 Bio Packs 2011
3 product groups segmented according to different needs

- **Carton Basic**: Low value, high functionality
- **Carton Bottle**: Low functionality, high value
- **Carton Value**: Ca. 80% or about 400 machines p.a. (2011)

Carton value relevant for e-beam: 80% of Tetra Sales, ~400 machines p.a. (2011), 3 platforms

- **Tetra Pak® A3/Speed I**: High speed solutions for high volume producers, e-beam key for high speed
- **Tetra Pak® A3/Flex**: Widest flexibility among different family package shapes and volumes, e-beam key enabler for efficient sterilization of various shapes
- **Tetra Pak® A3/CompactFlex**: Dedicated to portion package / different shapes and volumes, e-beam enabler for advance in chilled market
e-beam / Tetra Pak Update

Rollout plan is being substantiated - e-beam set as standard

- e-beam will be introduced first in the product platforms A3 Speed/ Flex/ Compactflex
- New business: 2 e-beam sources per machine
- Replacement: 2 e-beam emitters per machine

Variables
- Product mix: emitters of 270cm and 400cm
- Lifetime of emitter
- Pricing model: Cost plus
- Current price e-beam sources: high 5-digit number per machine
- Volume drives reduction of price per emitter

The liquid food market

e-beam business driven by huge potential of Tetra Pak:
> 2 billion extra consumers by 2020

Packaged 21%

Unpackaged, 79%

*Based on appr. 5,000 bio litres
COMET with new organization to assure roll-out at Tetra Pak and tap new market segments with growth potential

- e-beam split from Industrial X-Ray business effective April 1, 2013 and will operate independently
- e-beam business unit headed by C. Flükiger, President Industrial X-Ray and e-beam technologies
